

What is wrong with NAB.

If understand your position you are attempting to restrict free access to information for Americans!!

>>limit XM's ability to provide you with "locally oriented" content, including the new XM Instant Traffic & Weather channels.

I commute between Baltimore and DC daily.

I require dedicated programming to insure a SAFE commute.

I pay for satellite radio specifically for this service.

If I understand NAB's position and I loose this service is NAB willing to pay for my medical bills and support my family If I am injured in an accident due to inability to recieve up-to-minute traffic and weather reports?

IF NAB believes I have misunderstood their position please contact me at the email address provided.
